SUMMARY

Highly skilled MERN Stack Web Developer with extensive experience in designing, developing, and deploying web applications. Proficient in both front-end and back-end technologies, with expertise in creating intuitive user interfaces and robust server-side architectures. Demonstrated ability to use modern JavaScript frameworks for responsive and scalable applications. Strong collaborator in cross-functional teams, dedicated to staying updated with industry trends to enhance development practices and deliver innovative solutions.

SKILLS

Languages: HTML, CSS, JavaScript, Node.js, MongoDB.

Frameworks: Express.js, Bootstrap, React-Bootstrap.

Tools: Git, Git-Hub, Postman.

Libraries: React.

PROJECTS

| | | |
|-----------|--|---------------------------------|
| Project 1 | Portfolio I developed a full-stack portfolio web application using HTML, CSS, React-Bootstrap, and React for the frontend, and Node.js with MongoDB for the backend. The application features a responsive design and an intuitive user interface, allowing users to explore various sections of the portfolio seamlessly. It includes user authentication, profile management, and form submission for creating user data. The backend handles server-side logic, data storage, and user authentication efficiently. MongoDB is utilized for robust and scalable database management. | github.com link |
| Project 2 | FullStack-CRUD My project is a full-stack web application built using HTML, CSS, Bootstrap, and JavaScript for the frontend, and Node.js with MongoDB for the backend. The application features a responsive design with an intuitive user interface. It enables users to register, log in, manage their profiles, and perform CRUD (Create, Read, Update, Delete) operations. The backend handles user authentication, data storage, and server-side logic. MongoDB is used for efficient and scalable database management. | github.com link |
